

11.4

Sustainable practices

11.4.1

Does your university as a body measure and set targets for more sustainable commuting (walking, cycling or other non-motorized transport, vanpools, carpools, shuttlebus or public transportation, motorcycle, scooter or moped, or electric vehicles)?

University is committed to sustainable commuting all its campuses. Therefore, students use public transportation to come and go to the university for attending their lessons. Teachers are using different conveyance medium to reach university. Some are using cycles and some are using cars as well. However, many teachers come university by walking.

University promotes sustainable commuting all its campuses by putting limitations on personal vehicles.
