

15.3.3

Does your university as a body include local biodiversity into any planning and development process (e.g. construction of new buildings)?

Samarkand State University has its own construction and renovation body as Vice-Rector, Construction and Innovations that makes planning and development of new buildings for making them biodiversity friendly.

Office of the Vice-Rector is also committed to grow local plants and trees in the newly constructed buildings as well as during renovation of old buildings.

This photograph clearly indicates the determination of Samarkand State University for constructing environment friendly buildings which preserve local biodiversity.
