UNDERGRADUATE RESEARCH PROGRAMME IN BIOLOGY AND MEDICINE

The SUR Programme 2027 hosts about 15 undergraduate students from all around the world, studying towards a biology or medicine degree, to pursue an independent lab-based research project. Weekly workshops on presentation skills and career guidance are organised, as well as social activities. At the end of the summer, students present the results of their research on a poster during a symposium and prepare a written report. A scholarship is awarded to all selected participants.
